## iOS Developer – 100+ Lab Exercises (Basic, Intermediate, Advanced)

---

### Basic Level (30+ Exercises)

**Objective:** Master Xcode environment, Swift fundamentals, and basic UI design.

#### Environment Setup & Swift Basics

- Install Xcode and set up simulator.
- Create your first “Hello World” iOS app.
- Understand Swift syntax: variables, constants, data types.
- Control flow: loops, conditionals, switch cases.
- Functions, closures, and basic OOP in Swift.

#### Storyboard & UI Components

- Design UI using Storyboard: labels, buttons, text fields.
- Auto Layout basics and constraints.
- Add images and manage assets.
- Handle user input with UITextField and UITextView.
- Connect UI elements to code via IBOutlet and IBAction.

#### View Controllers & Navigation

- Manage View Controllers lifecycle.
- Navigation Controller and push/pop views.
- Modal presentation and dismissal.
- Passing data between view controllers.
- Implement tab bar controller.

---

### Intermediate Level (40+ Exercises)

**Objective:** Build interactive apps with persistence, networking, and custom UI.

## Table View & Collection View

- Create simple Table Views with static data.
- Use dynamic Table Views with custom cells.
- Implement Collection Views with grid layouts.
- Add swipe actions and reordering cells.
- Optimize scrolling performance.

## Data Persistence

- Save data using UserDefaults.
- Use Core Data for complex data storage.
- Read/write files to device storage.
- Implement Codable for JSON encoding/decoding.
- Sync data with iCloud Key-Value storage.

## Networking & APIs

- Fetch and parse JSON data using URLSession.
- Use Alamofire for advanced networking.
- Display remote images with SDWebImage.
- Handle async calls with Combine or async/await.
- Implement pull-to-refresh with UIRefreshControl.

## Multimedia & Sensors

- Play audio and video files using AVFoundation.
- Capture photos/videos with UIImagePickerController.
- Access device location with CoreLocation.
- Use accelerometer and gyroscope data.
- Implement local notifications.

---

## Advanced Level (40+ Exercises)

**Objective:** Master modern iOS development techniques and app deployment.

## SwiftUI Development

- Build views using SwiftUI declarative syntax.

- Implement data flow with @State, @Binding, @ObservedObject.
- Create custom components and animations.
- Manage navigation and transitions in SwiftUI.
- Integrate SwiftUI with UIKit components.

## Advanced iOS Features

- Implement push notifications with APNs.
- Add biometric authentication (Face ID/Touch ID).
- Use Combine framework for reactive programming.
- Integrate MapKit and custom map annotations.
- Implement in-app purchases and subscriptions.

## App Architecture & Testing

- Apply MVVM architecture pattern.
- Unit testing with XCTest.
- UI testing with XCUITest.
- Use Instruments for performance profiling.
- Automate builds with Fastlane.

## App Store Deployment & Security

- Code signing and provisioning profiles.
- Create App Store Connect listing.
- Implement app analytics and crash reporting.
- Secure sensitive data with Keychain Services.
- Obfuscate code and manage privacy compliance.

## Capstone Projects

- Build a weather app with location-based forecasts.
- Develop a notes app with Core Data sync.
- Create a chat app using Firebase backend.
- Design a fitness tracker with HealthKit integration.
- Develop an e-commerce app prototype.

## □ Optional Tools & Technologies

- Swift, SwiftUI, UIKit, Combine
